

catalytic converter theft.

Catlon has been developed in response to the massive cases of catalytic converter theft. It is a protection system that fits to the vehicle chassis and prevents the catalytic converter from being removed. They are made of stainless steel, which gives the product greater strength and durability.

Installation is simple, and no perforation is required as they are incorporated using the existing holes and fixing positions on the vehicle.

The product includes the following:

- A 6mm thick stainless steel plate.
- Anti-tampering security nuts
- A Catloc ISR marking and registration kit, with a unique identification code
- Warning stickers for the windows, to dissuade thieves

Supplied by official Toyota dealers. Once you have the identification code, you register it on the Catloc website. It's very simple. Here's the link so you can take a look <https://catloc.co.uk/es/> [<https://catloc.co.uk/es/>]
